H&F EXTERIORS

COMMERCIAL ROOFING SYSTEMS

Roofs built to outlast Midwest weather. Hail, heat and sudden storms are rough on South-Central Illinois and Eastern Missouri roofs, so H&F installs flat and shingle roofing systems. We are also certified to apply roof coatings which will add 20 years of life to your current roof at a fraction of the cost.

OUR SERVICES

SHINGLED ROOFING

Boost your property value with a beautiful, weather-resistant shingle roof built to handle extreme elements. Designed for multi-family complexes and office parks, commercial shingles deliver wind and fire resistance alongside classic appeal.

FLAT ROOFING

Slash your commercial building's energy bills while protecting your operation with a commercial-grade flat roof built to withstand the elements. Upgrade your facility with an energy-efficient roof that pays you back while protecting your assets.

PROTECTIVE COATINGS

Extend the life of your flat roof by an additional 20 years at 25-30% of the cost of a full replacement. Silicone coatings form a watertight barrier over your roof, making them a great alternative to a replacement.
